

PROJECTOR

PROJECTOR

Rock and roll is more than just music. It's an attitude. The sound of the streets. The look of the future.

Premier Projector kits are more than just drums. They're a statement of how you feel about your music. The hand-crafted birch and beech shells have the sound of thunder. The deep lacquer and brilliant chrome have the look of timeless beauty.

And now, Projector drums sound and look better than ever.

Hi-tension lugs—Premier's most copied innovation—are now featured on Projector. These rugged die-cast lugs have springless inserts and are diamond chrome plated for long lasting beauty.

Lacquer finish birch/beech shells—Projector shells are made of select Finnish birch, with German beech reinforced bearing edges. This design concept of thin shells with heavy bearing edges gives you the best of both worlds—the big, vibrant sound of thin shells—the sharp attack of heavy bearing edges.

Add a deep, hand-rubbed lacquer finish, and you've got the best looking, best sounding, best performing drums in the world of rock and roll.

Lacquer, Chrome and Thunder

Legless hi-hat for double bass players—This factory-custom stand gives double bass drum players a sturdy and compact hi-hat. Dual rim clamps position the hi-hat precisely and prevent the wobble and wander of single mount systems.

Fastball tom holder—One of the most versatile and easy to use tom holders on the market. It's also one of the few that doesn't have parts that protrude into the drum shell where they can upset the balance of the sound. Each Fastball holder has individual adjustments for height and rotation as well as the all-angle ball joint.

Projector—the combination of the best of Premier's new ideas and hand-crafted quality. A drummer friend recently put it into perspective. "Most new drums you play look and sound as if they were all made in the same computerized factory. Projectors have a unique feel about them that just makes you feel better when you play them. They've got soul."

Projector 9-piece

This powerful double bass kit has what it takes to create thunder on any stage.

This kit shown includes:

- 24 x 16" Bass Drums
 - 10 x 9" Power Tom
 - 12 x 10" Power Tom

Projector Shell-Pack

If you need a new drum set, but you're happy with your current snare and hardware, here's a great way to upgrade to Projector—the Shell-Pack. It's also a great way to build a drum set in stages, or expand a smaller Projector set.

- 20 x 18" Powerhouse Bass Drum
- 12 x 10" Power Tom
- 13 x 11" Power Tom
- 16 x 16" Floor Tom
- 2392 Tom Holder

Premier 2029 Heavy Rock Nine

Here's the ultimate snare drum for rock and roll. The heavy spun brass shell features 10 hi-tension lugs and Premier's celebrated Stress Ring hoops. Just looking at the outside tells you it means business. But the real story is inside the shell—it's lined with 3 plies of select birch, to give you the warmth and fatness of wood along with the cut of brass.

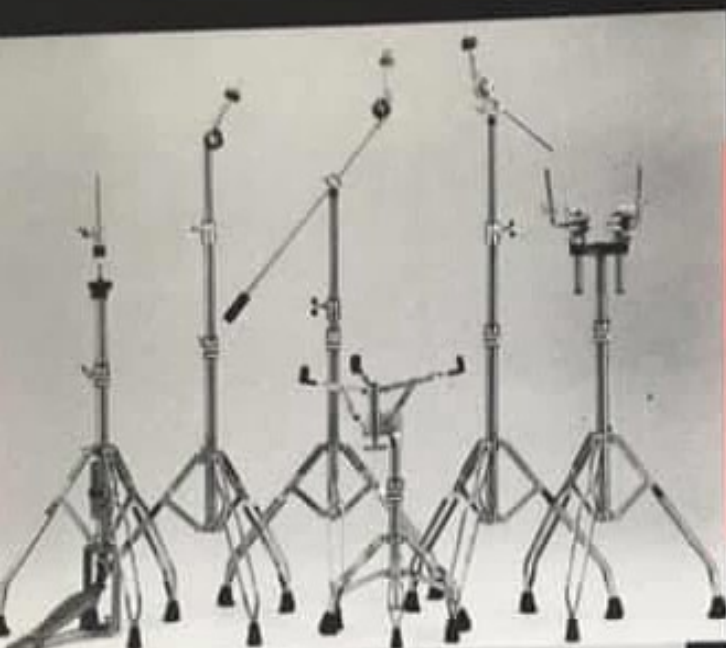

Premier 1036 Chrome Snare

Strength and power are hallmarks of this snare. The heavy duty 6½" deep chrome steel shell is beaded for extra strength and features 10 hi-tension tuning lugs. This drum has a thick tone and a cutting attack that's perfect for any kind of amplified music.

Premier 21 Brass Snare

More cutting than wood—warmer than steel. This brass shell beauty has a distinctive sound and power. 10 hi-tension lugs keep tuning rock solid, even when playing heavy rim shots.

4000 Series Hardware

Projector kits are equipped with Premier's top-line 4000 Series hardware. The 4000 Series includes a rugged snare stand, tripod and legless hi-hats, Fastball double tom stand, straight cymbal stand, short cymbal boom and counter-weighted cymbal boom. When you want to add to your kit, see your Premier dealer for stands, multi-clamps and accessories. You won't find a more functional or more carefully crafted line of hardware anywhere.

Projector Colours

With most other drum companies using a heavy single coat of polyurethane, a hand-rubbed lacquer finish is usually found only on custom-made drums. Projector drums are hand finished with multiple coats of deep gloss lacquer. Between coats, the drum is hand sanded and rubbed so that the final result is a deep and lustrous finish of lasting beauty.
