Slingerland

**THE WORLD'S LEADING MANUFACTURER
OF PRECISION DRUM EQUIPMENT**

NEW SLINGERLAND PLANT AND OFFICES THE WORLD'S LARGEST, MOST MODERN DRUM PLANT

The Slingerland name is recognized the world over as the finest in drum equipment. Founded in 1916 by H. H. Slingerland, the Slingerland Drum Co. has grown steadily and now is the largest manufacturer of drum equipment in the world. It is the only drum firm that manufactures and processes all of its own parts exclusively—which includes skilled wood-working, metal-working, plating, finishing and final assembling.

The Slingerland Drum Co. is constantly improving its quality, design and production in order to supply the ever increasing demand for its products.

THE *Slingerland* BOARD OF ADVISORS

Gene Krupa, world's most famous drummer

Haskell W. Harr
Educational Director
Slingerland Drum Company

Sonny Igoe, famous dance drummer and author

C. Oscar Stover,
Percussionist,
Director of Bands
Northwestern State
College

Myron Collins, Author
Band Director,
Percussion Instructor

FIVE basic reasons why *Slingerland* excels

1 THE HOOP

The Rim-Shot* counter hoop is the strongest made, guarantying perfect tension and sound. It is forged from solid brass to perfect size. It has more support for the flesh hoop (A) and is perfectly flat at (B) so that the flesh hoop cannot slide between the hoop and shell.

2 THE SHELL

The Slingerland shell is molded to a perfect circle and size in one operation. The veneers and inside solid maple reinforcing hoops are glued together at one time. This overcomes the strains on veneers which exist when a shell is made from flat plywood and then bent into a circle.

3 THE LUG

The Slingerland lug (or tension casing) is made of a high tensile strength non-ferrous alloy. The distance (D) is greater on Slingerland lugs. This gives more strength to resist the forces (F) and (F') when the drum is tensioned.

4 THE STRAINER

The new Zoomatic snare strainer is now standard on all Slingerland higher priced snare drums and parade drums. It is by far the strongest, smoothest and most efficient strainer ever designed.

COCKTAIL OUTFIT

The stand-up performer has been waiting a long time for this newest concept in cocktail units. It is composed of many features, which up to now only the more expensive, larger ensembles had. Note the disappearing spurs, the modern large chrome handle for easy pickup and go, the built-in snare stand that adjusts the snare drum from 27" to 38" from the floor. This outfit is compact enough to fit in the smallest playing area, yet with the real bass and snare sound comparable to no other cocktail outfit.

The new, solid brass - triple chrome plated - beautiful rim-shot counterhoop* gives you the best stick protection and the strongest hoops in the industry - guarantees even tension and better tone. Slingerland Drums have 30% more non-ferrous (non-rusting) metals than most other makes.

*PATENT No. 2,779,227. Holders not included. Please specify what model holders you desire and whether they are to be attached or not.

The new Slingerland tom toms are the finest instruments of their type. Rim shot metal counterhoops overcome the use of collar hooks, also unsightly flesh hoops. The counterhoops are the thickest hoops on the market today which give you a solid tone and preserve your sticks. These drums contain over 30% non-ferrous (non-rusting) materials than average tom toms which guarantee, for you, their lasting beauty and performance. Supplied with Sound King plastic heads unless calf is requested.

Features of *Slingerland*

THE BALL-BEARING CLUTCH

THAT DEFINITELY HOLDS IN ANY POSITION AND WILL NOT SLIP

The outstanding feature that places this timpani far in advance of all others is the Silent Ball-Bearing Clutch. Fifteen ball bearings lie in a cone-shaped solid steel housing. These bearings surround the "range post" and create a vice-like grip. This precision (patented) mechanism holds positive in any position. The holding positions are as flexible as a finger on a fiddle string—a hair's breadth movement does it.

PATENTED

POWER GRASP TUNING HANDLES

Symphonic experts have pronounced this feature highly important. Handles are large and full, form fit to hands for easy grasping, and provide quick, easy, hand tuning leverage. The handle is made of solid brass to prevent rusting due to perspiration. The rod is made of alloy steel—all parts are beautifully chrome plated.

ONE-SCREW SET UP

Just slacken the tension on the head, raise the pedal and engage the center pull rod with the wing handle. As simple as all that. One screw at base of kettle assembles the bowl and base mechanism. Set up or detached in a few moments—it's the quickest and easiest set-up ever designed.

EASY TO GET—COMPLETE RANGE

The range, easily obtained on the various size kettles is as follows:—

- 23", from D to A
- 25", from B flat to G
- 28", from F to D
- 26", from A to F
- 29", from E to B
- 30", from E flat to B flat

The positive action ball bearing Clutch pedal adjustment holds to all intermediate tones, and there is no "back-up" on the top notes like on some competitive makes.

PEDAL TIMPANI

THE IMPORTANT "BUMP" ON THE KETTLE BRACKET

When the pedal is up as far as it will go (only 8"), the bell-cranks come to a stop at the "bump" built into the kettle bracket. This stop al-

lows no strain on the inside rods when they are in this position. Therefore, when the player turns the handles to "iron out" the head tone to the lowest note, the strain is applied to the brackets and does not disturb the rods. All six inside tension rods are under EQUAL strain when the pedal starts to travel downward to create the various tones on up the scale and enables the player to KEEP even tension over the entire head surface at all times. This is a big factor in preventing that "pulled-down-on-one-side" condition seen on so many timpani which seriously interferes with true tone and tuning ease. The "bump" on the kettle brackets is a patented feature.

PLAYING CLEARANCE HANDLE

This is another feature exclusively on Slingerland timpani. The handle nearest beating spot is hinged to flip clear when playing. Thus it IS OUT OF THE WAY, and eliminates the accidental knock of beaters against the handle in rapid passages or where passing rolls are being played. This clearance handle tunes and adjusts like the fixed handles yet clears in an instant.

NEW TILTING MECHANISM

The Slingerland Timpani-Tilting Mechanism* is designed so that the timpanist can tilt his timpani to the most comfortable and easiest playing angle. This new mechanism is especially useful when the timpanist is seated, which he should be, while making the rapid pedal changes required in modern compositions.

DEEPER PARABOLIC BOWLS

The true parabolic design produces focused reflection of sound waves for tonal response. This feature of added depth and parabola is found only on Slingerland. Bowls are of genuine copper, one piece, seamless type, or fibreglass.

ONE-PIECE INSIDE REINFORCEMENT RING

This strong, sturdy alloy steel inside reinforcement ring is standard on all Slingerland timpani with either copper or fibreglass bowls. Its sturdiness gives you even tuning and a clear resonant tone.

THE SENSATIONALLY NEW*

Philharmonic Grand

PEDAL TIMPANI

***WITH THE PATENTED BALL BEARING CLUTCH THAT HOLDS IN ANY POSITION
SUPPLIED WITH PLASTIC HEADS UNLESS OTHERWISE SPECIFIED**

The Philharmonic Grand Pedal timpani, like other Slingerland timpani, produce a tone that is unequalled in any other make. The patented silent ball-bearing clutch mechanism is accepted as the finest by timpanists throughout the country—the pedal has no spring which requires constant readjustment. Instead, just tip the footboard forward to release the clutch, tip it back and the clutch holds at any note.

COMPLETELY NEW SLINGERLAND ROTARY VALVE SLIDES

NEW SOPRANO ROTARY SLIDE

NEW BASS-BARITONE ROTARY SLIDE

The new series F and F# rotary slides are available for all models. These new rotary valve slides are of the highest calibre. The new design and workmanship are key features of these new superior rotary valve slides. The rotary valves are designed and built for a long and dependable life, with bearing surfaces that distribute the friction load over a wide surface with less wear. The valve is fitted with unusual precision for smooth action. The fast acting horizontal valve lever is easily accessible and will allow even trills to be played! This skillful design permits an exceptionally short stroke for faster action and cleaner execution. A truly great achievement in rotary valve design, skillfully engineered with new bores which allow acoustical properties that improve both the tonal response and the tuning of each bugle.

Slingerland "Haskell W. Harr" parade drums are the most popular drums on the market. Their sound, beauty, and precision construction are the finest. They contain 30% more non-ferrous (non-rusting) metal than most other makes. The precision built rim-shot counterhoops are 50% stronger than others—resulting in more even tensioning and better sound.

Supplied with the new Zoomatic snare strainer—the smoothest, fastest acting and most sturdy snare strainer ever designed. Tone controls are standard on both parade and tenor drums. The shells are molded 3 ply with solid maple inside reinforcing hoops.

Supplied with "Weather-All" plastic heads unless calf heads are specified.

Supplied in whatever lacquer finish you desire—highly polished or in choice of pearl finishes—see back cover.

The Parade King Model Parade Drums are the same as those used by the Hawthorne Caballeros—American Legion National Champions for the past four years. The new Zoomatic snare strainer puts these models far ahead of any other make. The patented Rim-Shot counterhoops save wear and tear on your uniforms. The shells are molded 3-ply laminated veneers with solid maple inside reinforcing hoops. Supplied with Sound King plastic heads unless calf heads are specified. Tone controls are standard equipment on both parade and tenor drums.

SCOTCH DRUMS

by *Slingerland*

A NEW ADDED FLASH FOR YOUR MARCHING BAND!

The new *THIN* twirling Scotch Drums add tremendous flash and color to your marching band. The twirling rig is easily removable for handling and storage purposes. The sound and carrying power of these new drums is very close to a regular Scotch Bass Drum. The twirling rig is designed so that the drum may be locked in a vertical position or it may be spun on a frictionless ball bearing. The hardware on the drum is triple chrome plated.

Slingerland TENOR TYMP

The modern drum corps or school band is not considered a complete unit today unless it includes our tenor drums or tenor tymps. The flash of a well synchronized tenor drum section is the finest selling point that a corps or band can have. It gives the unit a profound distinction from a showmanship viewpoint that cannot be obtained in any other way. The flash, however, is strengthened by the use of our tenor tymps with chrome plated reflectors. THE TYMPANI LIKE TONE IS SUPERB. Supplied with plastic heads unless calf is requested.

\$4.50
LIST

NEW 3/16", 1/2", and 3/8" DIA. SHAFTS IN THESE MODELS - PERFECTLY BALANCED

THE BALL

Streamlined design, beautifully proportioned, gracefully tapered, and of gleaming white rubber.

THE SHAFT

Most accurately hammered indentations throw off sparkling sunbursts of light to make the illusion of tremendous speed. Maximum glitter with its triple, hand chrome plating. Great strength is another feature of the SPOTLIGHT model.

HOW TO ORDER

Place baton ball against neck of the performer and extend arm horizontally so that tip of the baton comes to about the first or second joint of the SECOND finger. (A variation of 1/2" to 1 inch is permissible.) Proper length is very important to make maneuvering easy and graceful. 3/8" dia. shaft is the favorite size.

DRUM RODS

CORRECT WAY TO MEASURE A DRUM ROD

Measure the distance from the collar to the end of the thread for the length of the rod (see above). There are two types of tensioning ends for rods—square head, for orchestra, parade and scotch drums—tympani handle for concert bass drums.

All rods have a 12-24 thread, except some old single tension parade drums had rods with a 10-24 thread.

Slingerland pearls are made of the finest materials available. Pearl finishes increase the life and beauty of your equipment. The hard glossy surface prevents scratching, chipping or peeling, due to the difference in the coefficient

of expansion of pearl and the shell, combination sparkle pearls cannot be guaranteed against a slight opening which sometimes develops between the edges. This will not hinder the looks, strength or tone of the drum.

*New Satin Flame finishes are available at slightly higher prices—add to list price \$12 for Bass Drums, \$7 for 14", 16", 18" Toms, \$3 for 12" & 13" Toms, \$3 for Snare Drums.
