Because Premier are constantly updating the choice of finishes available, a separate booklet detailing ALL current standard and non standard finishes will be available during summer 1998.

Colours printed on paper cannot accurately reproduce the exact colour of the applied finish. We therefore recommend that you check the original colours with your Premier dealer. Because we are constantly updating existing products and introducing new ones, and because we may be subject to material changes outside of our control, we reserve the right to change products, specifications and prices without prior notification or warning.

PREMIER

A tradition of quality, a history of innovation & a sound future

Choosing any musical instrument is a unique process, each player has a different style, a different list of requirements and very individual ideas about what their ideal sound and set-up should be.

At Premier we have 75 years experience in listening to sound engineers, drummers, and other musicians from every part of the world and we pride ourselves on discovering what players want and responding with practical innovations to give them exactly what they need.

Every Premier drum is hand crafted by skilled British craftsmen in our factory at the heart of England, from the internationally renowned Signia Marquis, Signia or Genista to the semi professional XPK and Cabria they are all made to the highest standards and have to pass the same set of rigorous quality

checks. The drums featured on these pages bear testimony to the skills and commitment of everyone at Premier who contributes to their design and manufacture and every person is justifiably proud in the knowledge that they have a vital part to play in producing some of the finest drums and accessories in the world.

XPK has long been a favourite choice for the semi professional player with its beautiful lacquer finished wood shells, excellent hardware options and classic sound, so much so that many top professionals choose the XPK as their second or touring kit in the knowledge that it will always perform superbly.

Premier also has a long history of catering for the player entering the world of drumming, and the legendary APK kit has for over 10 years provided the starting point for many of today's top players, but Premier are not a company to stand still, and by utilising new design and materials technology, combined with state of the art manufacturing processes, we have produced a brand new kit, the Cabria Lacquer Series. Since its launch in early 1998, the Cabria

Lacquer Series has caused an international storm, with stunning looks, a professional sound and a range of features only normally found in kits costing far more. We believe that this is the finest entry level kit ever made, truly a kit to take drumming into the new millennium.

**John James
Managing Director**

cabria *Lacquer Series*

This new drum series draws on more than 75 years experience that Premier has gained producing drums and percussion instruments to the very highest levels of quality and craftsmanship.

The Cabria Lacquer Series is a great starting point for anyone who wants to play drums but more than that it is a sound investment for the future. Whatever the demands of the player, no matter what experience they may have, these drums will satisfy them all.

The unique shell sandwich construction uses a eucalyptus outer ply perfectly bonded to a merranti inner to provide a finished, unsupported tom and snare drum shell that is just 5.2mm thick whilst the bass drums are 7.7mm thick. The microwave shell manufacturing process, together with the choice of grain structures and direction, means the relatively thin shells are as strong as shells up to 15% thicker. The end result is a shell that responds and resonates in the same way as the shells on drum sets costing far more.

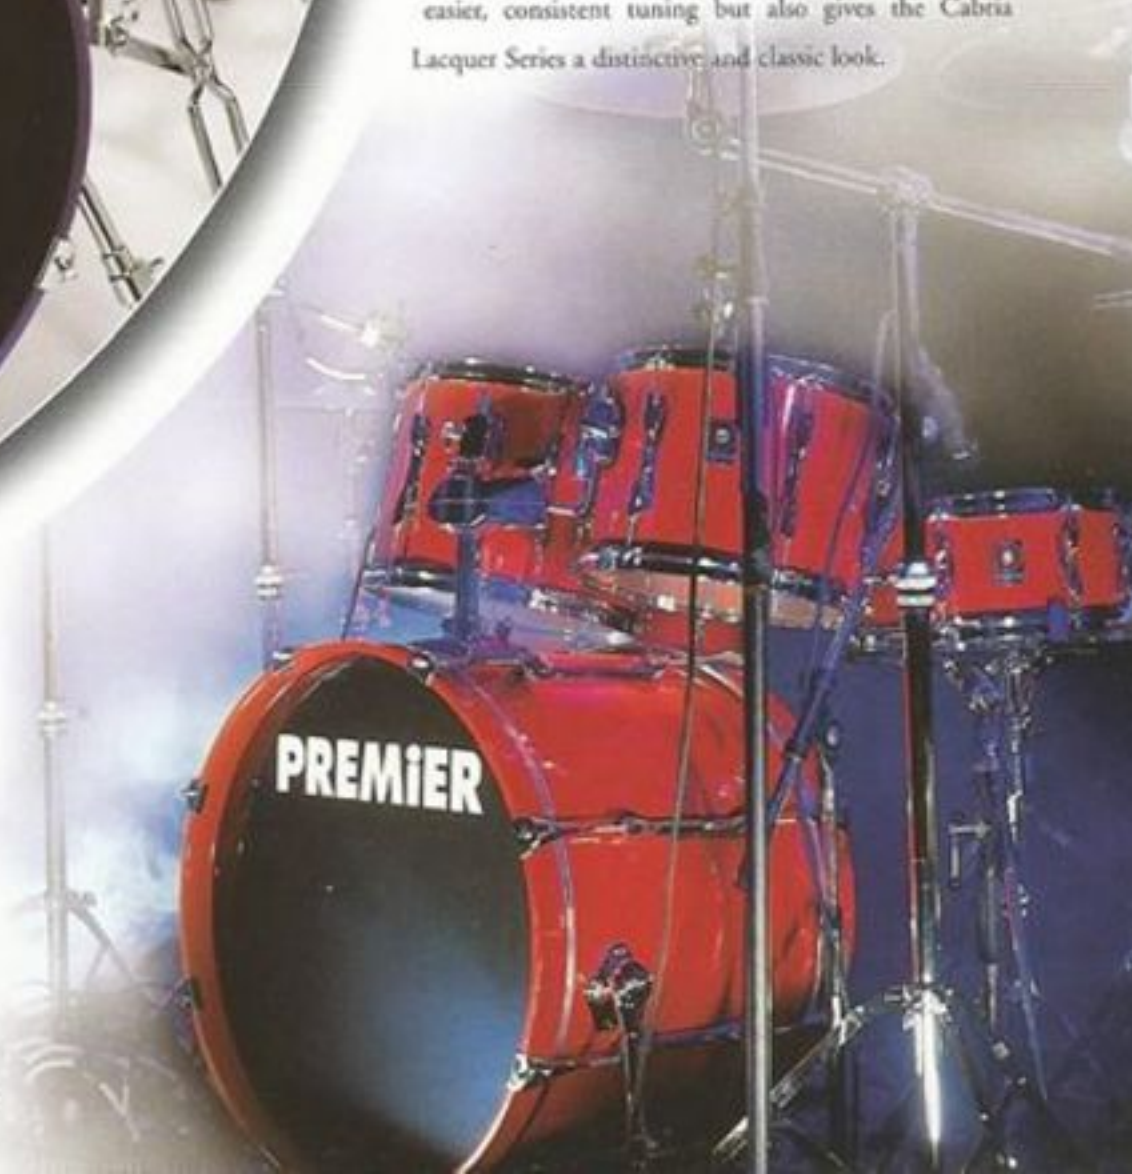

The new 'quick' size toms to be found on Cabria give a more definite attack and faster response than the more conventional standard and power depths giving more expression and character to your playing.

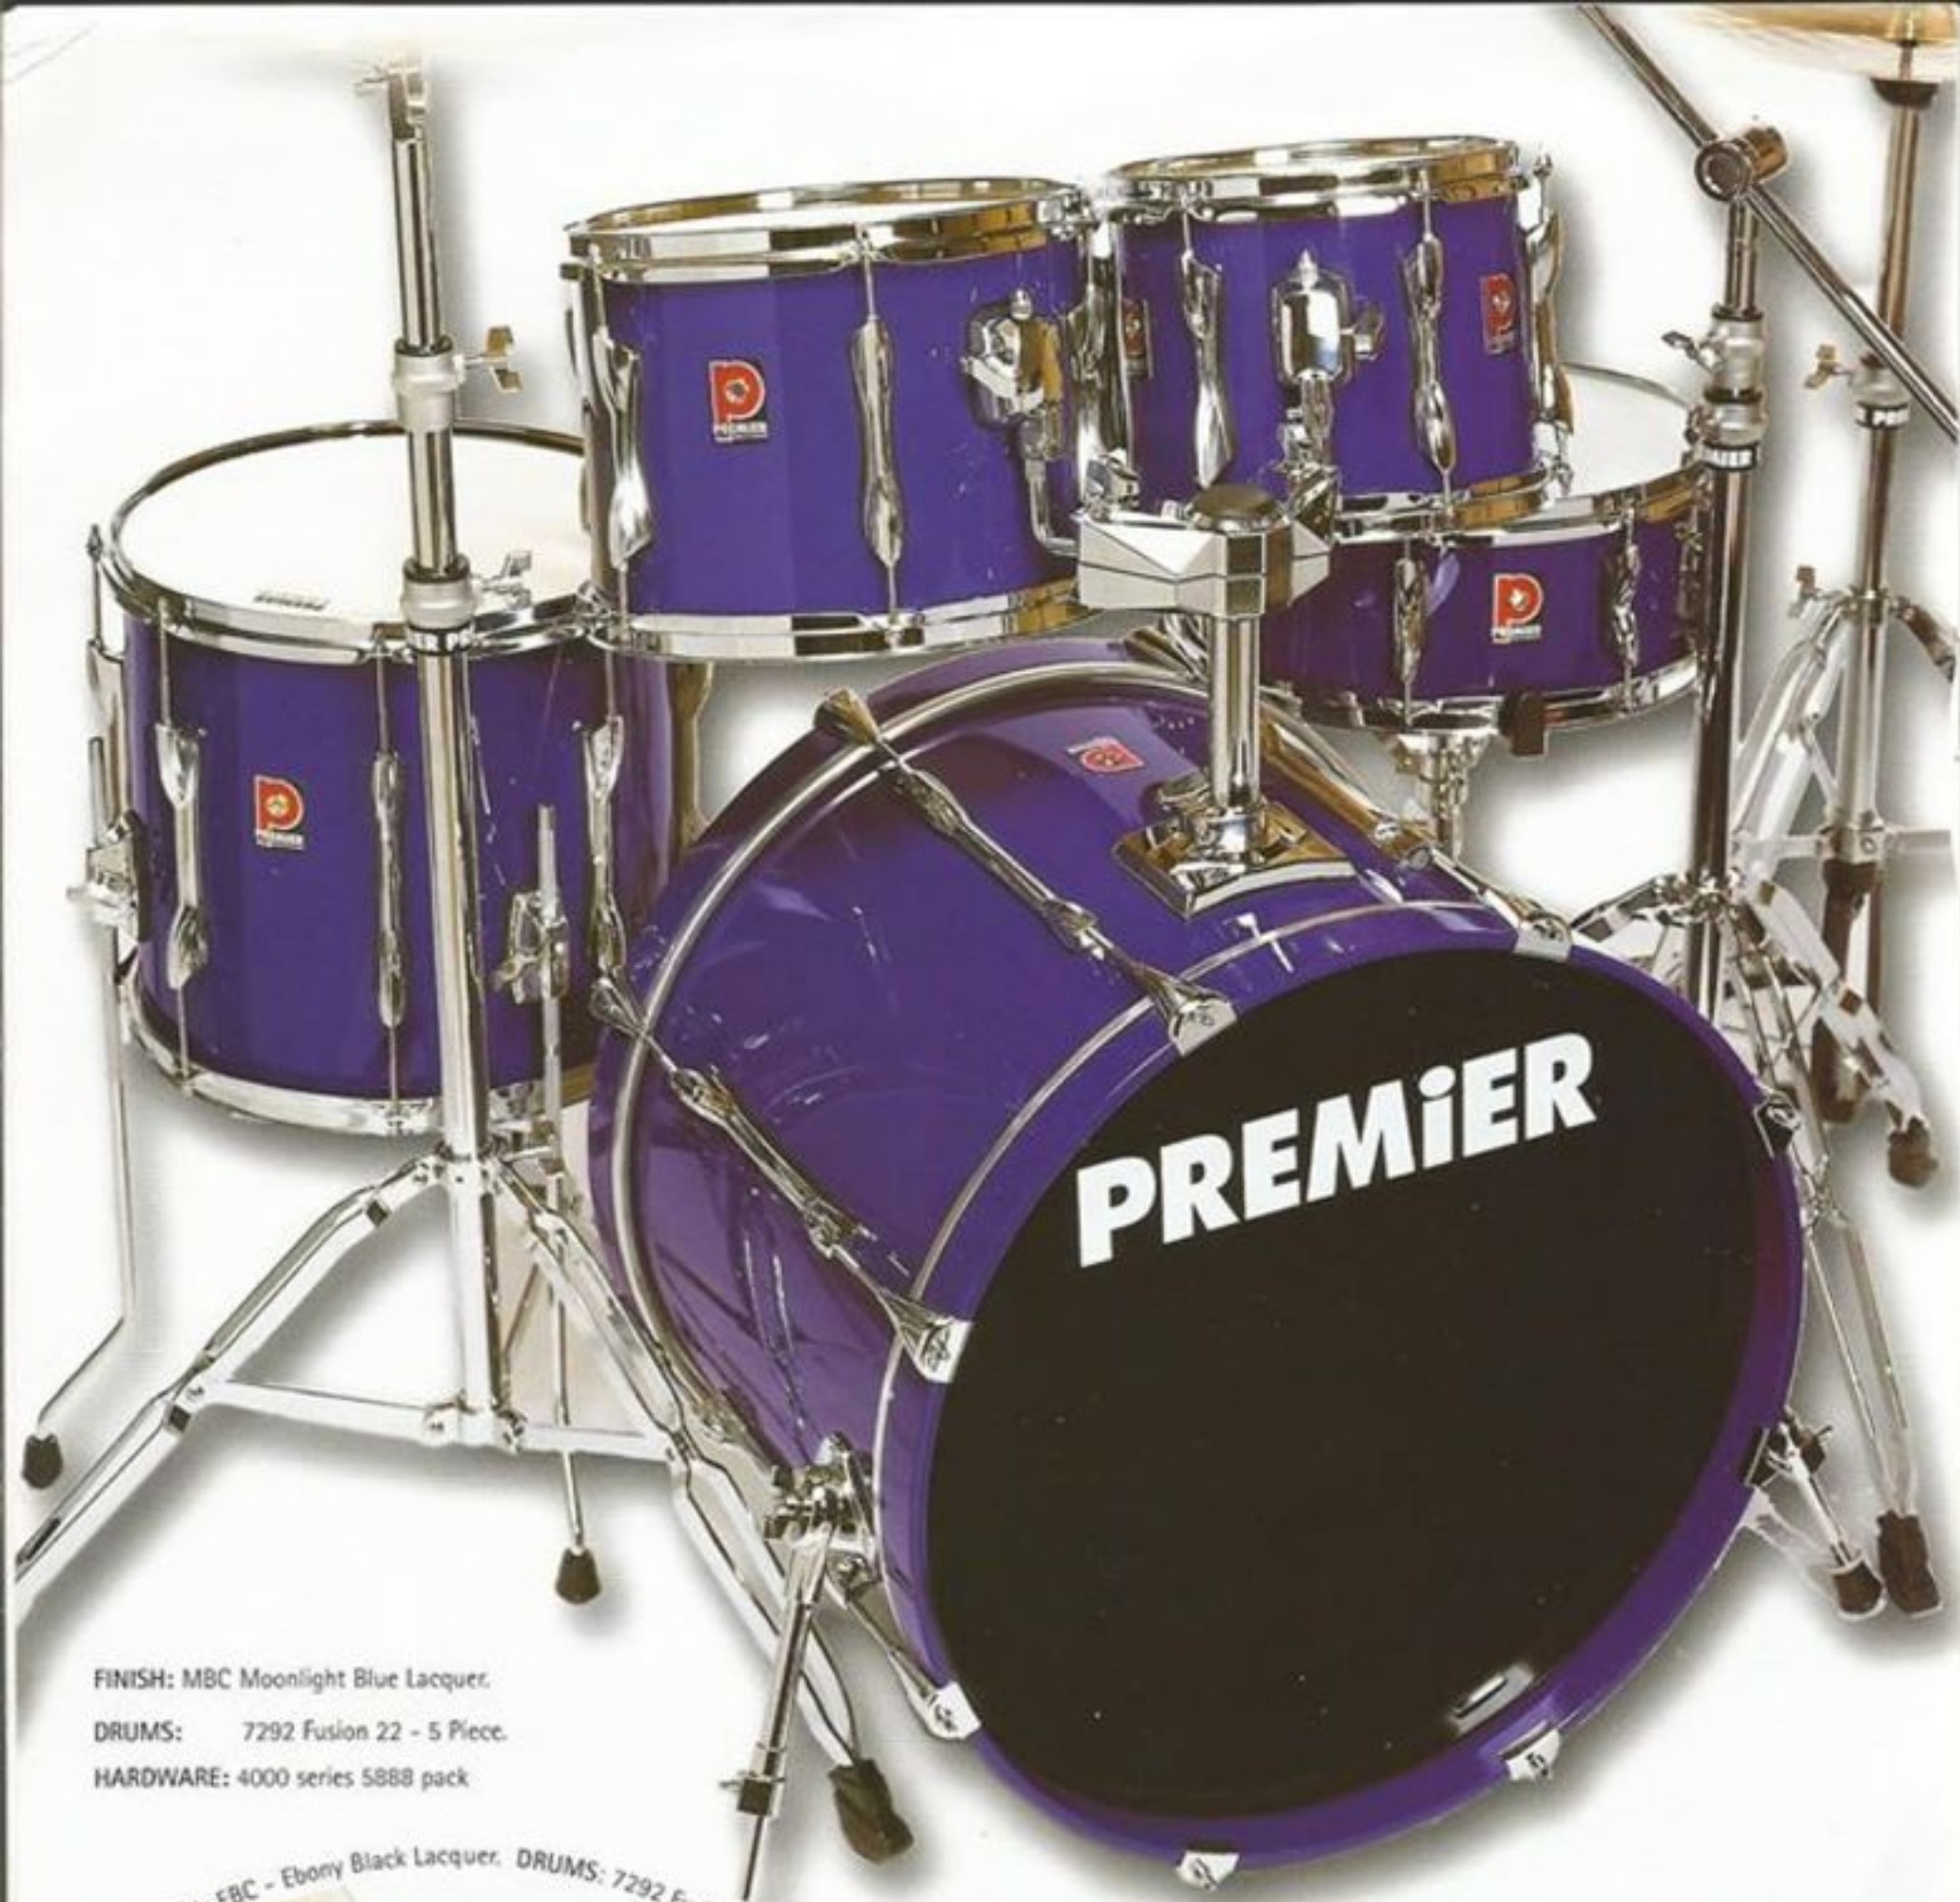

The single piece hi-tension lug is finished in Premier's 'diamond chrome' and this much admired and imitated Premier trade mark not only makes for easier, consistent tuning but also gives the Cabria Lacquer Series a distinctive and classic look.

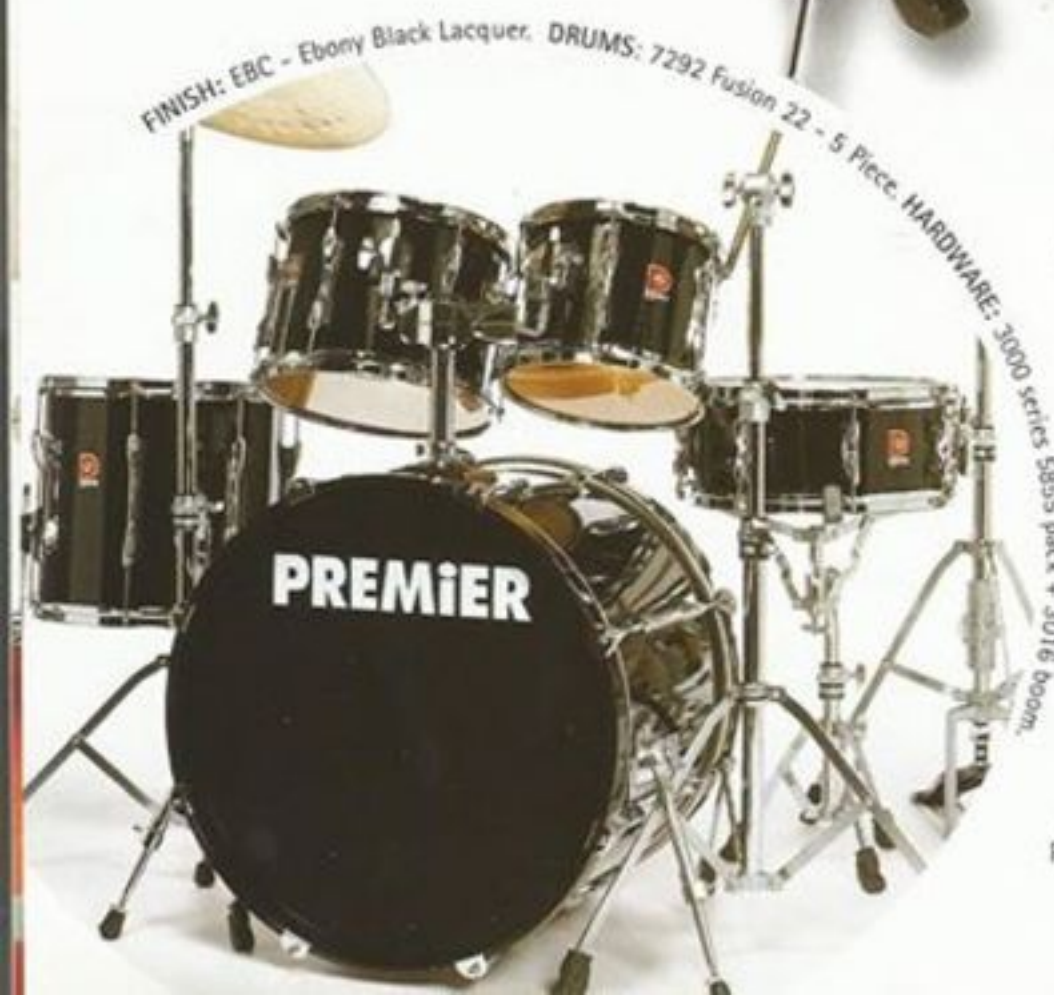

cabria

- High Gloss UV Lacquered Finishes
- Micro-wave Shell Construction
- Matching Wood Snare
- Professional Heads
- Range of Shell Packs & Loose Drums
- Diamond Chrome Fittings & Hardware

FINISH: MBC Moonlight Blue Lacquer.
DRUMS: 7292 Fusion 22 - 5 Piece.
HARDWARE: 4000 series 5888 pack

FINISH: EBC - Ebony Black Lacquer. DRUMS: 7292 Fusion 22 - 5 Piece. HARDWARE: 3000 series 5855 pack + 3016 boom.

That's the inside story. Outside is even more interesting. Lacquer finishes have, until now, been exclusive to more expensive drum series and regarded as 'the professional's choice' but with the Cabria Lacquer Series there is a choice of 8 exciting, high gloss lacquered finishes including 3 metallics as standard. These superb finishes extend to the matching 14" snare drum, again a feature that is only normally to be found on high-end products.

The UV lacquering process gives a depth and gloss to the finish that not only looks superb but because of its superior durability and excellent resistance to knocks will stay looking like new for longer.

The Cabria Lacquer Series has been designed to fulfil the needs of everyone from the young player wanting to make the best possible start through to the professional player who demands a high quality kit that doesn't cost the earth and really performs.

FINISH: IWC - Ivory White Lacquer. DRUMS: 7290 Fusion 20 - 5 Piece. HARDWARE 2000 series 5845 pack + 2116 boom.

hardware packs

From the 2000 series upwards, Premier hardware packs offer a great choice of features, styles and versatility that will satisfy the most demanding player. Opt for the 2000 or 3000 series if weight is a primary consideration or the 4000 and 5000 if it is greater strength and more comprehensive adjustment that you are looking for.

The contents of the basic hardware packs are:-

2000 & 3000 series, snare drum stand, hi hat stand, gymbal stand, bass drum pedal, 2016 boom gymbal stand (optional) and 3016 gymbal stand (optional)

4000 & 5000 series, snare drum stand, hi hat stand, gymbal stand, boom gymbal stand and bass drum pedal.

FINISH: SL - Sapphire Lacquer. DRUMS: 6000 Fusion 20 - 5 Piece. HARDWARE: 2000 series 5815 pack + 2016 boom.

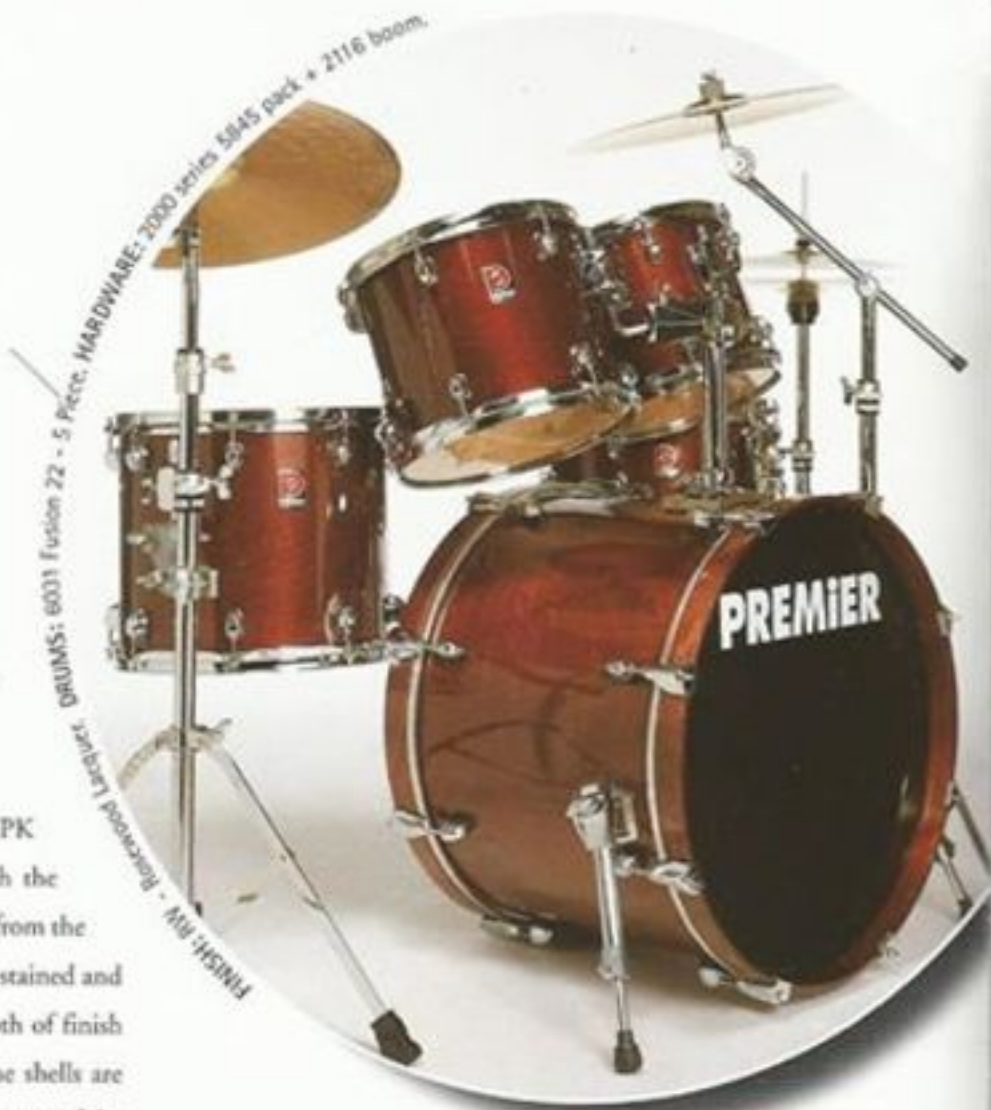

The long time choice of many professional and semi-professional players XPK has, since its introduction, established itself as one of the best 'value for money' kits available and won numerous consumer and industry awards world-wide.

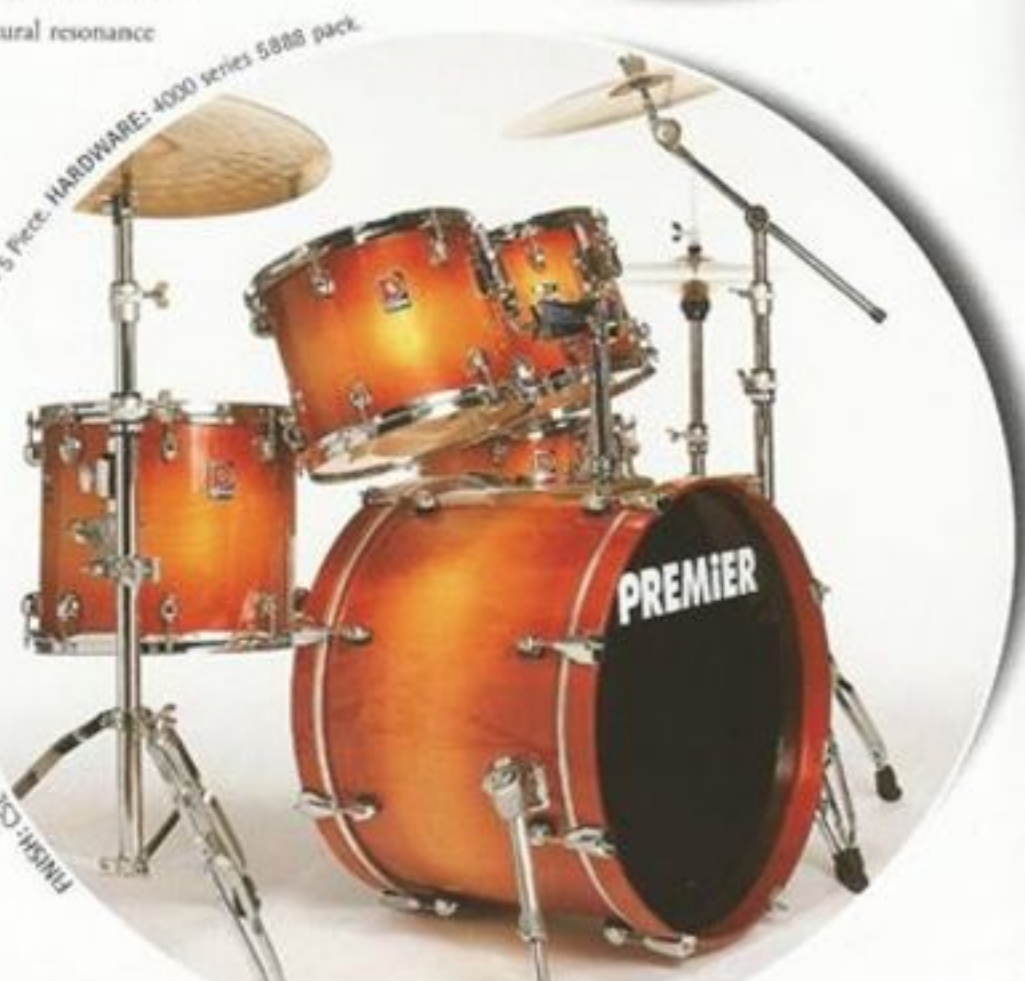

The Birch-Eucalyptus-Birch shell construction gives the XPK series a stunning appearance both inside and out along with the sound, durability and reliability that you have come to expect from the very best professional kits. The external surface of the shells is stained and lacquered using water based high gloss lacquers to give a depth of finish and colour that is the envy of our competitors. Internally the shells are clear lacquered to enhance the attractive colour and grain structure of the finest Finnish Birch as well as adding to the overall natural resonance and attack of the shell.

The exclusive low-mass XPK lug has been designed to reduce the amount of surface contact with shell itself and to minimise any vibration and rattle. This has been achieved by the use of spring-less bracket nuts and an integral nylon cushion inside the lug. Small, but important, details that have a dramatic effect upon the drums performance.

There is a wide choice of drum sizes available in XPK as well as 3 standard shell packs in a choice of 7 standard lacquer finishes which, when chosen alongside any one of 4 standard hardware packs, can satisfy any player's needs.

FINISH: RW - Rosewood Lacquer. DRUMS: 6031 Fusion 22 - 5 Piece. HARDWARE: 2000 series 5845 pack + 2116 boom.
