TAMA OAK STICKS

Unlike many drumsticks, Tama sticks are made from cured and seasoned oak. Oak is a very hard wood with excellent grain consistency from piece to piece. When properly cured, oak is very stable and will resist warping to a great degree. When applied to drumsticks, these properties are most important. First of all, a hard stick will be durable. Oak sticks resist chipping and cracking better than any others. Also, a hard stick will be very lively, with excellent rebound from both drums and cymbals.
