## Star-Cast Mounting System (PAT. PEND.)

It's common knowledge that free suspension mounting systems allow drums to resonate much more freely than standard mounting. What's not common knowledge is that not all free suspension systems are created equal. The Star-Cast system is more than equal. You have the complete, unrestrained sound of free suspension mounting without the adverse affects on tuning and troublesome head changes found in less advanced systems.

## Hoop Grip (PAT. PEND.)

This unique, but simply designed attachment can hold a tom tom with minimal stress on the hoop and no contact on the shell itself.

## Tom Holder

MTH900M

Our MTH900's modular design allows it to be used as a double or single tom holder—or as a combination tom / cymbal holder. Height and angles of both toms are individually adjustable, and Tama's rock-solid original Omni-ball system ensures that your tom set-up stays set up.

## Lugs

Both Rockstar and Rockstar Custom drums feature the same die-cast high tension lugs for durability and tuning stability. To help protect Rockstar Custom's polished lacquer finish, Rockstar Custom lugs come equipped with a special rubber insulator that prevents direct contact between the lug and shell.

## Bass Drum Accu-Tune Hoops (US PAT. NO. 5,177,000)

Was there a good reason for Tama's designers to replace the old standard hoop with the high tech Glass Fiber Reinforced Plastic Accu-Tune hoops? Actually there were a lot of good reasons: easier and more stable tuning, lighter weight, better resonance, and because Accu-Tune hoops dispense with clawhooks, easier pack up and transport. An angled groove at the bottom of the hoop provides secure pedal connection.

The original no-compromise concept behind Tama Rockstar was to provide a fully comprehensive drum line with professional looks, sound and features—all at an affordable price. The concept works: the critically acclaimed Rockstar and award\* winning Rockstar Custom continue to be the standard by which other drums are judged.

Both Rockstar and Rockstar Custom start with Tama's famous cross laminated, staggered seam construction that produces shells so strong. Rockstar's resonant shell is made of Philippine mahogany with an inner ply of basswood and then wrapped with one of eight different, road-durable finishes including three new metallic colors. For drummers who desire the beauty of a natural wood finish, the Rockstar Custom shell is crafted of an inner ply of basswood, five inner plies of Philippine mahogany and an outer ply of basswood finished in high gloss polished lacquer.

Both Rockstar and Rockstar Custom catalogue sets now come equipped with the same high technology Tama hardware...the MTH900M modular tom mount with the unmatched rock solid stability of Tama's Omni-ball system...the Accu-Tune bass drum hoop...and the most sophisticated version of free suspension tom mounting available, the Star-Cast system.

\*Rockstar Custom was given 1999 Music and Sound Retailer award as Best New Acoustic Drum Product of the year.

### Bass Drum Spur Brackets

MSB25

The MSB25 spur brackets are simple, but very strong. In addition, the spurs can be pulled out and inserted in the side for storage and transportation.

### Heads

An affordable set isn't affordable if it comes standard with substandard heads that have to be replaced before you can get a good sound. With Rockstar and Rockstar Custom drum heads, you'll get a great sound practically right out of the box. Batter heads made of Dupont Mylar® ensure richer tone and greater durability, and bass drum heads with ring mufflers eliminate the need for internal muting.

### Hardware

HSSR

Even if you're just starting out, two cymbal stands are a must. Now all catalogue Rockstar and Rockstar Custom kits include the double-braced HC62R straight stand and the HC63BR boom stand. The HSSR hardware kit also features the HH45R hi-hat stand, the HS50R snare stand and the HP20 chain drive pedal.

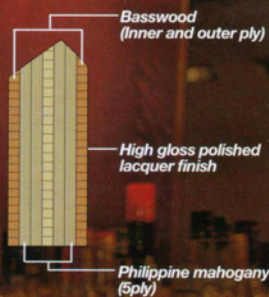

# Rockstar Custom

Not only do Rockstar Custom drums look completely professional, they sound completely professional. Rockstar Custom's shells with their gorgeous transparent finishes have the focused attack and warm sound of drums many times their price. To make a great sound even better, the Star-Cast mounting system with Tama's new Hoop Grips allow more natural rack tom resonance and completely unrestrained vibration.

**TAMA**®

## Shell

Rockstar Custom shell is crafted of an inner ply of basswood, five inner plies of Philippine mahogany and an outer ply of basswood finished in high gloss polished lacquer.

## Snare Drums

Rockstar Custom catalogue sets come standard with matching shell and finish wood snare drums. Available in two sizes: the RP155 5-1/2" x 14" and the RP165 6-1/2" x 14".

# Rockstar

First Tama Standard Maple and Standard Performer. Then Rockstar Custom. And now, Rockstar rock toms also feature the acclaimed Star-Cast mounting system. With Rockstar's affordable price, more players than ever can experience the real sound advantages of free suspension mounting. For 1999, three new exciting metallic finishes have been added to the Rockstar line.

Basswood (1ply)

Completely glued covering finish

Philippine mahogany (7ply)

## Shell

Rockstar's resonant shell is made of Philippine mahogany with an inner ply of basswood and then wrapped with one of eight different, road-durable finishes including three new metallic colors.

## Snare Drums

Rockstar snare drums feature the penetrating, full bodied sound of a steel shell. Available in two sizes: the RD165 6-1/2" x 14" and the RD155 5-1/2" x 14".
