

A tradition of quality, a history of innovation & a sound future

## New for 1999

Combined with the Signia Marquis, Signia Maple, Genista and the Cabria Lacquer Series the new products featured in this supplementary brochure illustrate just why the range of drums now offered by Premier is one of the strongest and most comprehensive available from any single percussion manufacturer.

Cabria Exclusive with its range of exciting new lacquered stain finishes provides the appearance and performance of a high-end drum series for those looking to buy within a more affordable but specific price band. With the new XPK and XPK Astria the semi-professional has a much wider choice of sizes, finishes and features than ever before whilst the Vitria series, with its new maple shell construction, is very much designed for the serious player. For those who prefer to isolate mount their rack toms Premier's new ISO Mounting System is the perfect, cost effective solution.

The much acclaimed EDP300 Bass Drum Pedal is now offered in a completely new total system format that allows the player to determine just how their pedal should look, feel and perform.

All of these new world beating products come from a dedicated manufacturer with more than 75 years experience and a total commitment to quality and the art of the drummer.
